

## Line Adaptor Unit

**Line Adaptor Unit (AUH1b + AUJ2b + AUL3b + AUC + AUIS + AUJ2t2 + AUL3t2 + AU2m3)**

### **Features**

- Convert RJ45 (8p8c) modular socket to UK right hand socket
- Full Primary Master, PABX and Secondary Slave units available
- Suitable for EIA/TIA 568B Modern Networks
- Flying lead converter suitable for use in floor boxes
- Adaptors also available with 3m flying leads
- Alternative wiring available (see attached spec sheet), as well as full range of RJ11 (6p4c) modular plug to UK right hand socket and ISDN version.

### **Specifications**

- Unit length: 160mm approx
- Housing: ABS
- Flying lead: Jacket - PVC
- Insulation – PP

### **Special note:**

**PBX Master:** British Telecommunications have reported that the presence of a surge arrestor in the network termination can interfere with broadband signals in the UK. For this reason we are now supplying our PBX UK Voice Modules with both a ring capacitor and an out of service resistor so that we can now recommend this version for both PBX and PSTN connections. Please contact us with any queries.
