

UK Style Telephone Line Jack Units

UK Style Telephone Line Jack Unit (code: various)

TUK offers a comprehensive range of UK style line jacks. All variants are shuttered and are available with IDC or screw terminals. PSTN Master, PBX Master and Secondary versions are available. Left hand versions are available to order

Specifications

- Colour: White
- Enclosure materials: ABS
- IDC connectors: LSA+ type
- Components: Ring capacitor – 1.8 μ F
- Resistor – 470KOhm
- Surge arrester – Thyristor Type STPA200

Definitions

- **PSTN Master:** Ring capacitor, surge arrester and opt out service resistor. Used for direct exchange lines
- **PBX Master:** Ring capacitor and out of service resistor. Used with PBX type telephone systems where surge protection is provided at the network interface. British Telecommunications have reported that the presence of a surge arrester in the network termination can interfere with broadband signals in the UK. For this reason we are introducing the resistor for our PBX line jack units and we now recommend this version for both PBX and PSTN connections. Please contact us with any queries.

- **Secondary / Slave:** No mastering components. Used for parallel extension sockets

Series	Type	Code	Dimensions	Features
Series 1	PSTN Master IDC	11A	55 x 55 x 29mm	<ul style="list-style-type: none"> • Supplied with a backbox and fixing screws
	PBX Master IDC	12A		
	Secondary IDC	13A		
	PSTN Master Screw	14A		
	Secondary Screw	16A
